## EDUCATION

**Gautam Buddha University**

*B.Tech -Electronics and Communication Engineering*

**2022 - 2026**

*Greater Noida, India*

## INTERNSHIP

**Concrete Software Solutions Pvt Ltd** 

*Frontend Developer*

**March '25 – Present**

*Greater Noida, Uttar Pradesh*

- Built clean, responsive, and user-friendly interfaces for the Let Us Nudge web platform.
- Designed interactive dashboards to manage tables and waitlists in real time.
- Collaborated closely with backend developers to integrate APIs and ensure seamless functionality.
- Focused on delivering a smooth, consistent user experience for both restaurant staff and customers.
- Followed performance and accessibility best practices to optimize the frontend.
- **Technologies Used:** React.js, Next.js, TypeScript, Tailwind CSS, Storybook, Git, Lighthouse, Web Vitals, Jest.

## PROJECTS

**QuickStay**  | [React.js](#), [Vite](#), [ESLint](#)

**2025**

- Developed a hotel booking website where users can search and book rooms.
- Created separate dashboards for guests and hotel owners.
- Used React with Vite for fast, optimized builds.
- Managed configs with environment variables and maintained clean code with ESLint.

**next-rental-app**  | [Next.js](#) , [Tailwind CSS](#)

**2025**

- Made a modern property rental website using Next.js and Tailwind CSS.
- Users can search for homes by location and property type using a search panel.
- Showcases trusted partner, verified listings, and 24/7 support for reliability.
- Highlights special offers with “Super Sale” badge for better engagement.
- Includes clear navigation for Home, About Us, Services, Facilities, and Blog.
- Fully responsive design for seamless experience on desktop.

**WanderNest**  | [Node.js](#), [Express.js](#), [MongoDB](#), [Mongoose](#), [Passport.js](#), [EJS](#)

**2024**

- Built an Airbnb-like stay-booking website using Node.js, Express, and MongoDB with Mongoose.
- Added user login and signup with Passport.js, and used dotenv for secure settings.
- Created dynamic pages with EJS and served CSS, images, and other static files.
- Let hosts add, edit, and manage listings; users could post reviews and ratings.
- Included flash messages for success and error alerts, and organized clean routes for listings, reviews, and users.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript , Java

**Frontend Technologies:** React.js, Next.js , Bootstrap, Tailwind CSS

**Backend:** Node.js, Express.js

**Databases:** MongoDB, SQL

**Developer Tools:** VS Code, Git-Hub, Git, Hoppscotch
